Oracle Cloud

Questions & Answers

(Demo Version - Limited Content)

Question: 1

You want to move an Exadata Cloud@Customer VM cluster to a different OCI compartment for increased isolation from other teams that use Exadata. What happens when you use the console to do this?

A. The vM cluster, compute nodes, and underlying Exadata infrastructure will move to the new compartment. All other resources remain the same.
B. After it is deployed, a VM cluster cannot change compartments.
C. The VM cluster and associated databases will move to the new compartment. All other resources will remain in the existing compartment.
D. The vm cluster, compute nodes, and associated databases will move compartments. All other resources will remain in the existing compartment.

Answer: D

Question: 2

You are asked to create a MySQL Database Service system. You can log in to the group's Oracle Cloud Infrastructure tenancy and access the assigned compartment, and all policies have been configured and tested. What is the next step to create a MySQL Database Service?

A. Create the MySQL DB system.
B. Create a Virtual Cloud Network by using the VCN Wizard.
C. Create a Linux compute instance.
D. Connect to the MySQL Database Service system endpoint.

Answer: B

Question: 3

Which is NOT a prerequisite for patching Grid Infrastructure or database homes when using the console?

A. All database compute nodes of the VM cluster are up and running.
B. Oracle Clusterware is down on the VM cluster.
C. The /u01 directory on the database host file system has at least 15 GB of free space for the execution of Patching processes.
D. The required patch is available on the Control Plane server.

Answer: B

Question: 4

You want to permanently delete the DB System and its attached HeatWave cluster. Which actionshould you perform?

A. Drop the DB system and terminate the associated HeatWave Cluster
B. Terminate the DB system and drop the associated HeatWave Cluster.
C. Delete the Heatwave Cluster and it will also delete the DB system.
D. Delete the DB system and it will also delete the attached HeatWave Cluster

Answer: D

Question: 5

Which system configuration is offered by the Oracle Database Exadata Cloud Service?

A. Each system configuration starts with a fixed amount of OCPU, memory, storage, and network resources.
B. Each system configuration starts with a fixed amount of memory and storage resources.
C. Each system configuration starts with a fixed amount of OCPU and storage resources
D. Each system configuration starts with a fixed amount of OCPU, memory, and network resources.

Answer: A
