Question: 1

How do you refresh a materialized view?

- A. ALTER VIEW REFRESH
- B. REFRESH MATERIALIZED VIEW
- C. Materialized views are automatically refreshed by snowflake and does not require manual intervention

Answer: C

Explanation:

Materialized views are automatically and transparently maintained by Snowflake. A background service updates the materialized view after changes are made to the base table. This is more efficient and less error-prone than manually maintaining the equivalent of a materialized view at the application level.

<https://docs.snowflake.com/en/user-guide/views-materialized.html#when-to-use-materialized-views>

Question: 2

How do you validate the data that is unloaded using COPY INTO command

- A. After unloading, load the data into a relational table and validate the rows
- B. Load the data into a CSV file to validate the rows
- C. Use validation_mode='RETURN_ROWS'; with COPY command

Answer: C

Explanation:
Validating Data to be Unloaded (from a Query)

Execute COPY in validation mode to return the result of a query and view the data that will be unloaded from the `orderstiny` table if COPY is executed in normal mode:

```
copy into @my_stage
from (select * from orderstiny limit 5)
validation_mode='RETURN_ROWS';
```

Question: 3

Select the true statements about TASKS

- A. TASKS cannot be triggered manually
- B. TASKS can be scheduled for SQL execution
- C. TASKS can be used for change data capture
- D. TASKS can be used with STREAMS

Answer: A, B, D

Question: 4

Which statement is not true about shared database?

- A. Shared databases are read only
- B. Shared databases cannot be cloned
- C. Time travel is not supported on a shared database
- D. Shared databases can be re-shared with other accounts

Answer: D

Explanation:

General Limitations for Shared Databases

Shared databases have the following limitations for consumers:

Shared databases are read-only. Users in a consumer account can view/query data, but cannot insert or update data, or create any objects in the database.

The following actions are not supported:

Creating a clone of a shared database or any schemas/tables in the database

Time Travel for a shared database or any schemas/tables in the database. Editing the comments for a shared database.

Shared databases and all the objects in the database cannot be forwarded (i.e. re-shared with other accounts).

<https://docs.snowflake.com/en/user-guide/data-share-consumers.html#general-limitations-for-shared-databases>

Question: 5

COMPRESSION = AUTO can automatically detect below compression techniques when FORMAT TYPE is CSV

- A. GZIP
- B. BZ2
- C. BROTLI
- D. ZSTD
- E. DEFLATE
- F. RAW_DEFLATE

Answer: A, B, D, E, F**Explanation:**

AUTO

Compression algorithm detected automatically, except for Brotli-compressed files, which cannot currently be detected automatically. If loading Brotli-compressed files, explicitly use BROTLI instead of AUTO.
