Answer: D

Explanation:
Services Supported
Object Storage
Autonomous Transaction Processing
Autonomous Data Warehouse
Oracle Streaming Service
https://github.com/oracle/oci-service-broker

Question: 4

When you create a cluster, you need to download a Kubernetes configuration (kubeconfig) file for the cluster. Which three steps should be completed before downloading the kubeconfig file?

A. Generate an API signing key pair.
B. Verify whether you can access the cluster using Kubernetes Dashboard.
C. Install and configure the Oracle Cloud Infrastructure CLI.
D. Creating Kubernetes secret.
E. Added the public key value of the API signing key pair to the User Settings for your username.

Answer: ACE

Explanation:
Before you set up the kubeconfig file later in the tutorial, you must have already done the following (if you haven't, or you're not sure, see the Setting Up Cluster Access topic in the Container Engine for Kubernetes documentation):
generated an API signing key pair
added the public key value of the API signing key pair to the User Settings for your username
installed and configured the Oracle Cloud Infrastructure CLI (version 2.6.4 or later)

Question: 5

You are looking for a Cloud service that helps you easily create web and mobile apps. Based on the requirement you would like to extend the apps with the required customization. Which Cloud service is ideal for this requirement?

A. Oracle Functions
B. Visual Builder Studio
C. Oracle Kubernetes Engine
D. WebLogic Server for OCI

Answer: B
