Question: 1

The following screen displays order details in a client's order system application. An order is entered into the Order number field and the details for that order are displayed. There is a requirement to read the Product code value from the resulting display. The Product code will vary between orders.

The Product Code label has been successfully spied and the following attributes have been returned:

Element Details

Name   Label - Product Code

Description

Element Type   Label   ▼   Data Type   Text

Attributes   Notes

Name	Mat...	Match Type	Value
Window Text	☑	= (Equal)	Product code
Visible	☑	= (Equal)	True
Screen Visible	☑	= (Equal)	True
Enabled	☑	= (Equal)	True
Class Name	☑	= (Equal)	WindowsForms10....
Y	☐	= (Equal)	89
X	☐	= (Equal)	12
Width	☐	= (Equal)	72
Type Name	☐	= (Equal)	
Screen Bounds	☐	= (Equal)	RECT:215,314,327,2...
Parent Y	☐	= (Equal)	200
Parent X	☐	= (Equal)	200
Parent Window Text	☐	= (Equal)	View order
Parent Width	☐	= (Equal)	222

The Product Code value field has been spied and the following attribute set has been selected:

Element Details

| Name | Screen Text - Product Code |
| Description | |

Element Type | Label ▼ | Data Type | Text

Attributes | Notes

Name	▼ Mat...	Match Type	Value
Y	☑	Dynamic	89
Window Text	☑	= (Equal)	BQT-38
Visible	☑	= (Equal)	True
Screen Visible	☑	= (Equal)	True
Enabled	☑	= (Equal)	True
Class Name	☑	= (Equal)	WindowsForms10....
X	☐	Dynamic	89
Width	☐	= (Equal)	45
Type Name	☐	= (Equal)	
Screen Bounds	☐	= (Equal)	RECT:292,314,327,3...
Parent Y	☐	= (Equal)	200
Parent X	☐	= (Equal)	200
Parent Window Text	☐	= (Equal)	View order

In order to ensure a consistent match for the Screen Text – Product Code element, which of the following statements must be considered:

1. The Dynamic value of the Y attribute for the Screen Text – Product Code element must be derived from the Y attribute of the Label –Product Code element

2. The Y attribute of the Label –Product Code element cannot be derived as it is not checked

3. The Y attribute for the Screen Text – Product Code element must be set to a Match Type of 'Equal'

4. The Window Text attribute for the Screen Text – Product Code element must be set to a Match Type of 'Wildcard'

5. The Window Text attribute for the Screen Text – Product Code element must be un-checked

A. 1 and 4
B. 1, 2 and 5
C. 3 and 4
D. 1 and 5

Answer: D

Question: 2

Which of the following Application Models follow Blue Prism Best Practice:

A

```
⊟ Order System
       Button - Continue
       Log in Window
       Input - Staff Number
       Input - Password
       Button - Sign in
       Options Window
       Input - Option Number
       Button - Go
       New Order
       Input - Product Code
       Input - Number Required
       Input - Cost Centre
       Input - Unit Price
       Screen Text - Total Price
       Button - Submit Order
       Order Confirmation
       Screen Text - Order Reference
```
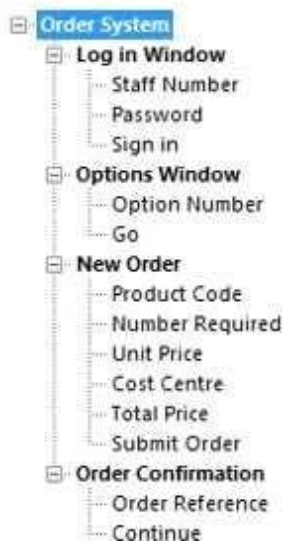

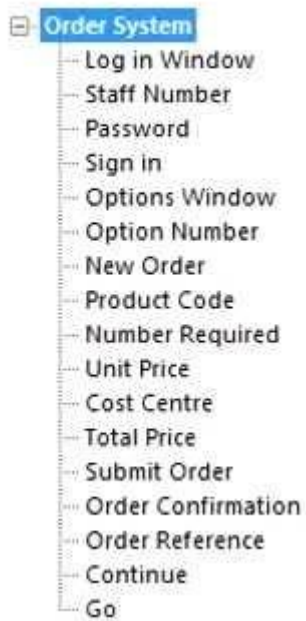

B

```
⊟ Order System
   ⊟ Log in Window
         — Input - Staff Number
         — Input - Password
         — Button - Sign in
   ⊟ Options Window
         — Input - Option Number
         — Button - Go
   ⊟ New Order
         — Input - Product Code
         — Input - Number Required
         — Input - Unit Price
         — Input - Cost Centre
         — Screen Text - Total Price
         — Button - Submit Order
   ⊟ Order Confirmation
         — Screen Text - Order Reference
         — Button - Continue
```

C

```
⊟ Order System
   ⊟ Log in Window
         — Staff Number
         — Password
         — Sign in
   ⊟ Options Window
         — Option Number
         — Go
   ⊟ New Order
         — Product Code
         — Number Required
         — Unit Price
         — Cost Centre
         — Total Price
         — Submit Order
   ⊟ Order Confirmation
         — Order Reference
         — Continue
```

D

Order System
— Log in Window
— Staff Number
— Password
— Sign in
— Options Window
— Option Number
— New Order
— Product Code
— Number Required
— Unit Price
— Cost Centre
— Total Price
— Submit Order
— Order Confirmation
— Order Reference
— Continue
— Go
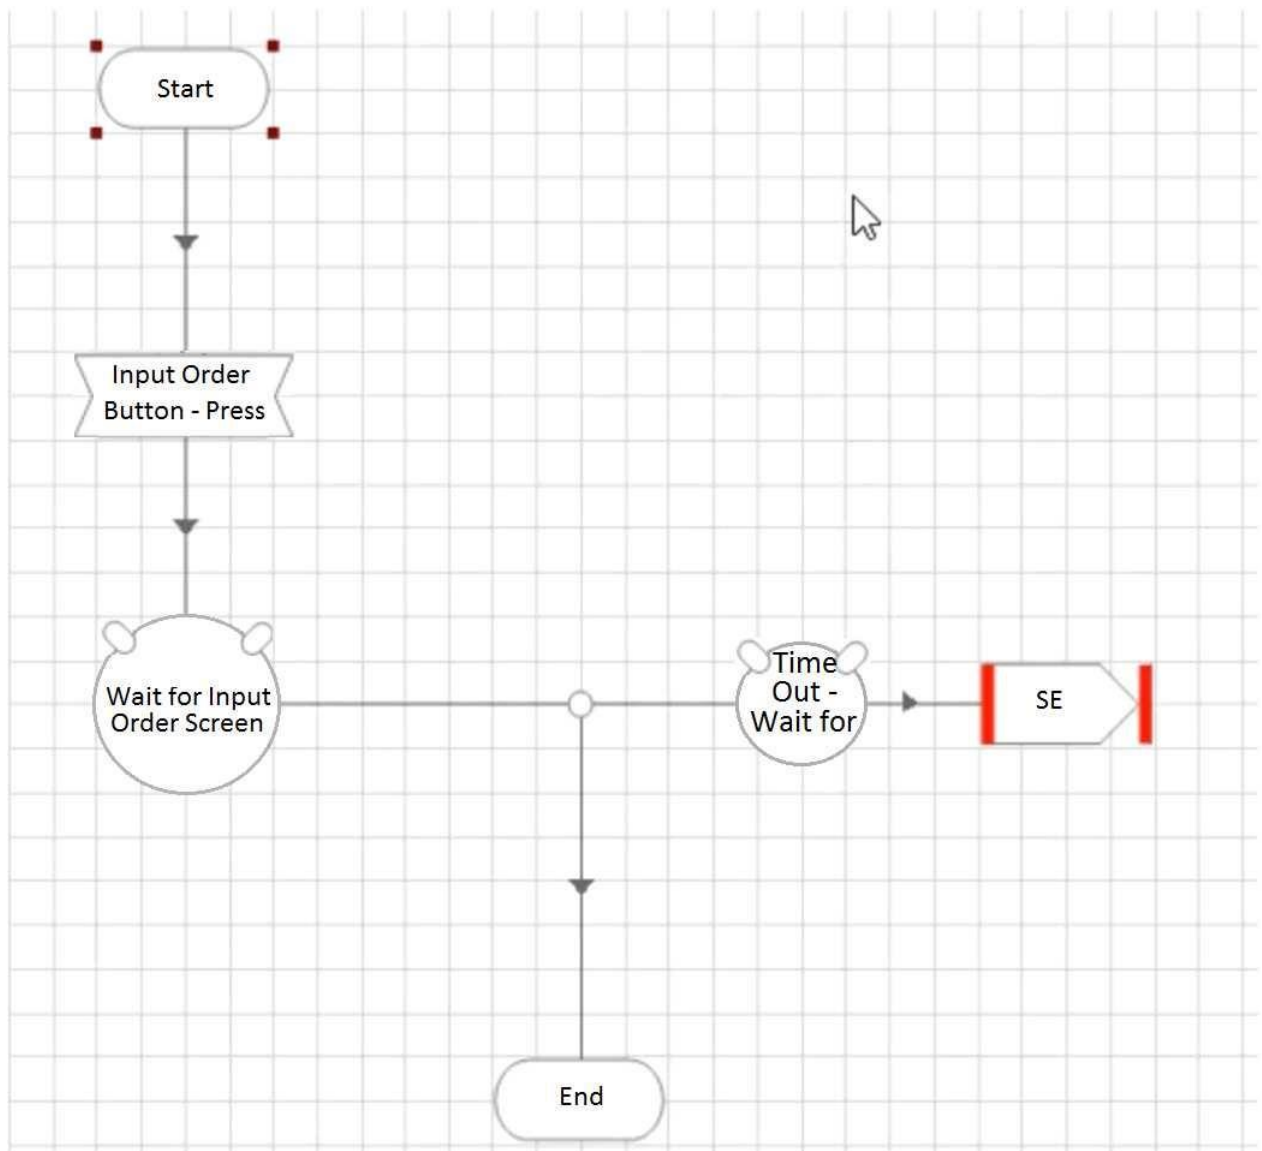

A. Option A
B. Option B
C. Option C
D. Option D

Answer: C

Question: 3

Which of the following four configurations depicts the best approach for an Action that has been built to select a button to navigate to an Input Order screen?
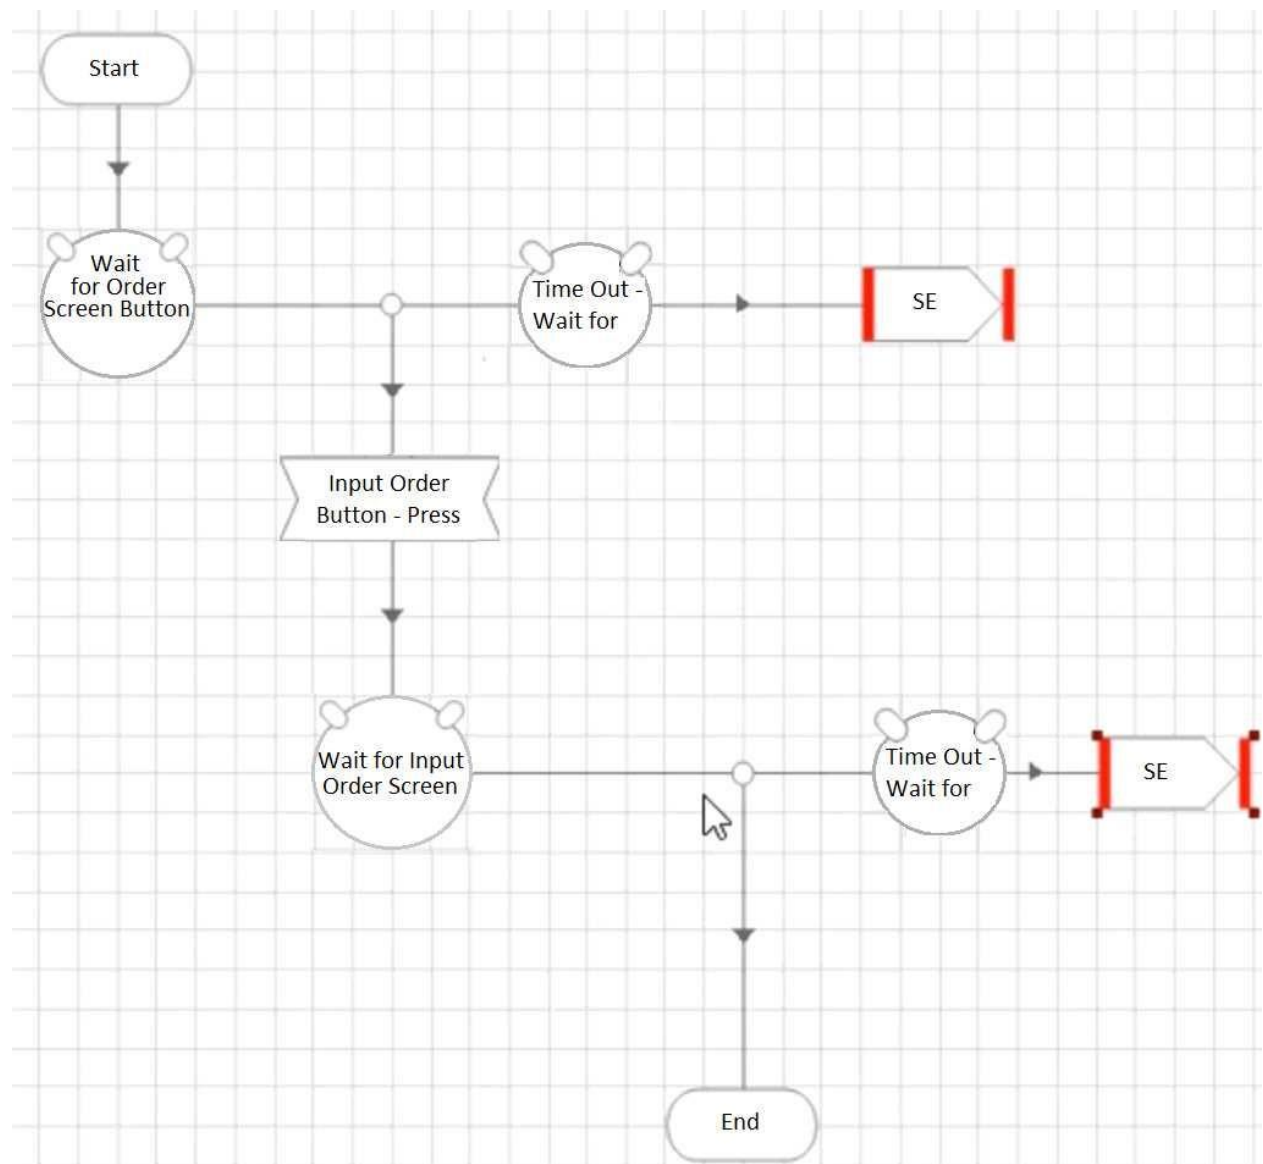

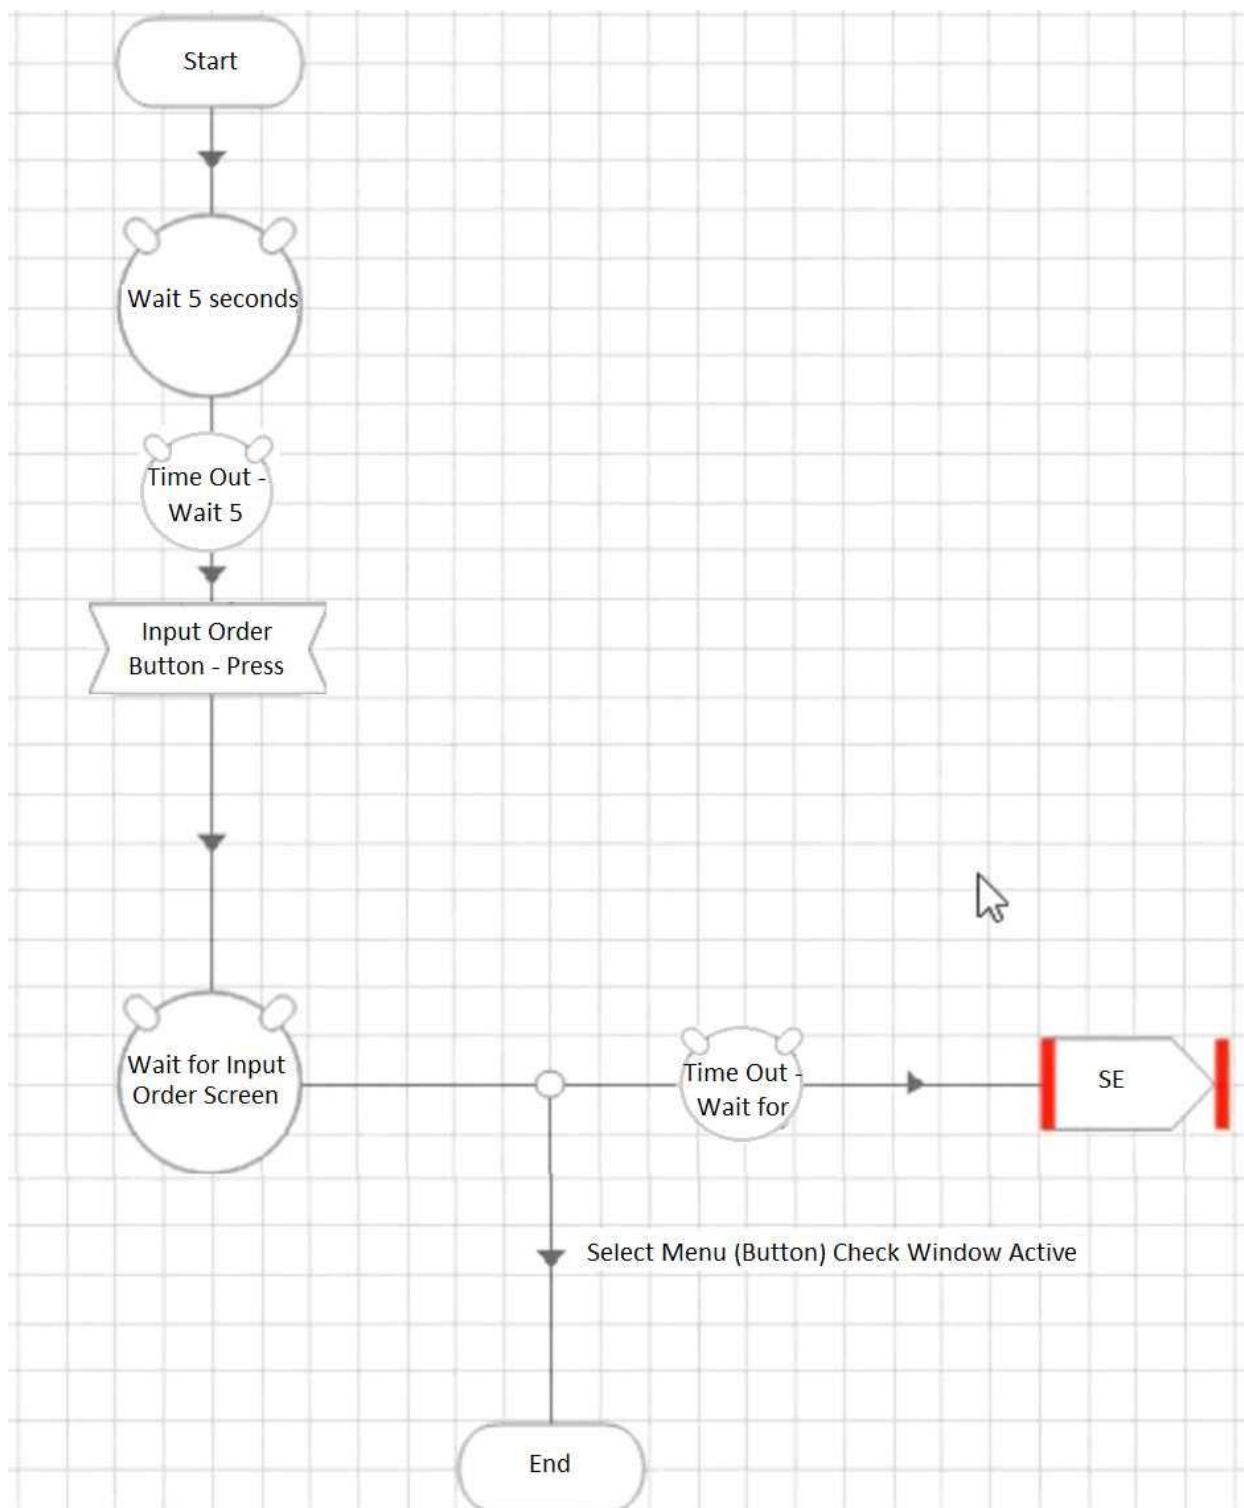

A. Option

B. Option

C. Option

D. Option

Answer: A

Question: 4

A Process Definition Document, for a new process to open ISA accounts, specifies that the value "2008 Cash ISA" is to be entered into the Product Selection field of the following screen:

The Product Selection field is a drop down menu with the following options available:

According to Best Practice, which of the following design options are correct for populating the Product Selection field with the value 2008 Cash ISA:

A. The Product Selection value should be hard coded as 2008 Cash ISA in the stage that will populate the field.
B. A text data item, with an initial value of 2008 Cash ISA should be configured. This data item should be used as the input value to the stage that will populate the Product Selection field.
C. An input parameter should be configured in the start stage allowing the calling process to determine what value to be populated into the Product Selection number field
D. All of the above

Answer: C

Question: 5

A Process is fed cases to work from a spreadsheet held in a shared drive. The location of the shared drive is different between Development and Production environments. How should this be managed?

A. During the build and test phase, hold the 'Development' path to the spreadsheet in a data item within a Process. When the Process is imported into Production it will be opened and the data item will be amended to hold the 'Production' path.
B. During the build and test phase, hold the 'Development' path to the spreadsheet in a data item within a Process. Expose this data item as a Session Variable. When the Process is run in Production, this Session Variable value can be set in Control Room
C. Hold the Path to the spreadsheet as an Environment Variable
D. Pass the Path as a Startup Parameter when the process starts

Answer: B
