---

**Question: 1**

---

True or False: One benefit of using an agile approach is an increased ability to deliver business value.

- A. FALSE
- B. TRUE

---

**Answer: B**

---

**Explanation/Reference:**

The benefit of becoming more agile is to increase the ability to deliver business value.

---

**Question: 2**

---

What can executives do to help their organization make effective portfolio investment decisions?

- A. All of the above.
- B. Define the initiatives that the organization should pursue.
- C. Create organizational goals that are clear and measurable.
- D. None of the above.
- E. Carefully plan the initiatives to maximize team efficiency.

---

**Answer: C**

---

**Explanation/Reference:**

Organizational initiatives are most effective when they are based on their goals and a way to measure progress towards those goals.

---

**Question: 3**

---

Your organization has several different products. Because the products are small, the organization does not believe it is worthwhile for each product to have a full-time dedicated team. What strategy would you suggest if a single team is to work on the different products to deliver the most value overtime?

- A. Both strategies will deliver the same value.
  - B. Have the team work on one product at a time, release it, and then move on to the next product.
  - C. Have the team allocate enough time each week to work on each of the products and release them when needed.
-

---

**Answer: B**

---

**Explanation:**

Limiting work in progress helps teams to better focus and deliver work sooner than to have many items in progress.

---

**Question: 4**

---

An experiment will help you to:

- A. validate or reject a hypothesis.
- B. understand how users use the product.
- C. create reliable estimations.
- D. create a work plan for a product release.

---

**Answer: A**

---

---

**Question: 5**

---

Which of the following would be the most reliable way of learning more about a newly discovered opportunity that you are considering but still have questions about?

- A. Hire a specialist to assess the potential size of the opportunity.
- B. Design and run small experiments to learn and expand your understanding of the new opportunity.
- C. Gather feedback from stakeholders on the potential value of the new opportunity.
- D. All of the above.

---

**Answer: B**

---
