- A. The maintenance planning plant and the maintenance plant can never be the same.
- B. It is the highest-level element of all the organizational units.
- C. The Plant at which the operational systems of a company are installed is called the maintenance plant.
- D. If maintenance work is planned at this plant, the maintenance plant is also the maintenance planning plant.

Answer: C, D

Explanation:

Question: 2

Which edition allows more extensive customer modifications?

- A. Cloud edition
- B. On-premise edition

Answer: B

Explanation:

Question: 3

What characterizes the architecture of a simple application?

- A. Reduction in number of tables
- B. Push data-intensive tasks to SAP HANA
- C. Use of dedicated aggregation tables
- D. No data redundancy
- E. Works with any database

Answer: A, B, D

Explanation:

Question: 4

What does a virtual data model provide?

- A. A copy of the database optimized for analytical use
- B. Consumption-ready views of data
- C. Reporting tools for users
- D. Ready-to-use business reports

Answer: B

Explanation:

Question: 5

Which of the following pieces of information are available in the production order?

- A. Order components
- B. Order costs
- C. Production dates
- D. Production instructions
- E. All of the above
- F. None of the above

Answer: E

Explanation:

Question: 6

A billing document can be created from what two types of documents?

- A. Sales order
- B. Inquiry
- C. Rebate list
- D. Quotation
- E. Delivery

Answer: A, E

Explanation:

Question: 7

Which of the following areas are available in SAP S/4HANA?

- A. Concur
- B. Marketing
- C. SuccessFactors Employee Central

D. Enterprise Management

Answer: B, D

Explanation:

Question: 8

Which of the following technologies is the preferred technology to achieve a harmonization across solutions?

- A. Dynpro
- B. SAP Screen Personas
- C. SAP Flowers
- D. Floorplan Manager

Answer: C

Explanation:

Question: 9

What are the three implementation scenarios covered by SAP Activate?

- A. New implementation
- B. Landscape transformation
- C. System conversion
- D. Database migration

Answer: A, B, C

Explanation:

Question: 10

What is the basic procurement process in an SAP system?

- A. Purchase requisition, purchase order, goods receipt, invoice receipt
- B. Goods receipt, purchase order, invoice receipt, vendor master
- C. Sales order, production order, purchase order
- D. Inquiry, sales order, purchase order, delivery

Answer: A

Explanation:

Question: 11

Which of the following are typical tools used by key users to develop various analyses in SAP S/4HANA Embedded analytics?

- A. SAP HANA Live Browser
- B. KPI builder
- C. Query Designer
- D. Design Studio

Answer: B, C, D

Explanation:

Question: 12

What are some of the trends driving the need for a reengineered business suite built for the digital world?

- A. Business users are taking on more technical IT tasks
- B. Increase in ownership of mobile devices
- C. Massive increase in device connectivity
- D. Adoption of cloud computing

Answer: B, C, D

Explanation:

Question: 13

The installation locations for equipment in a technical system are documented in the_____.

- A. Job List
- B. Usage List
- C. Measuring Points
- D. Equipment View

Answer: B

Explanation:

Question: 14

Name the manufacturing execution process step that allows someone to enter the actual time and activities of the various operations during the production process.

- A. Costing
- B. Disaggregation
- C. Material requirements planning
- D. Confirmation

Answer: D

Explanation:

Question: 15

In the SAP Easy Access menu, you can create a favorites list containing:

- A. Links to files
- B. Web addresses
- C. Transactions

Answer: A, B, C

Explanation:

Question: 16

What are the three pillars of SAP Activate?

- A. SAP Best Practices
- B. Performance tuning
- C. Methodology
- D. Guided configuration

Answer: A, B, C

Explanation:

Question: 17

The starting point for the corrective maintenance process usually is a_____.

- A. Catalog
- B. Notification
- C. Order
- D. Activity

Answer: B

Explanation:

Question: 18

What features of SAP HANA enable massive data footprint reduction for SAP S/4HANA?

- A. Support for data aging strategies
- B. Use of hierarchical cache
- C. Column store tables
- D. On-the-fly aggregation from line item tables

Answer: A, C, D

Explanation:

Question: 19

Which of the following is the correct sales order management process?

- A. Sales order, delivery, picking, goods issue, billing
- B. Picking, sales order, goods issue, billing, delivery
- C. Sales order, picking, goods issue, billing, delivery
- D. Goods issue, picking, sales order, delivery, billing

Answer: A

Explanation:

Question: 20

Which of the following is used for calculating the next planned date for preventive maintenance orders?

- A. Technical Completion date of the previous Order
- B. Maintenance Plan start date of the previous Order
- C. It is pre-determined and will not be recalculated
- D. Confirmation date of the task

Answer: A

Explanation:

Question: 21

What are the key functionalities in SAP Cloud Platform?

- A. Open APIs
- B. Microservices
- C. Edge computing
- D. Integration

Answer: A, B, D

Explanation:

Question: 22

Inspections and repair work requiring the shutdown of an entire asset is performed at regular intervals can be handled using_____.

- A. Project-Oriented Maintenance
- B. Preventive Maintenance

- C. Corrective Maintenance
- D. A Breakdown Maintenance

Answer: A

Explanation:

Question: 23

Which of the following processes (applications) are part of the production processes?

- A. Manufacturing execution
- B. Master production scheduling
- C. Sales and Operations Planning
- D. Delivery processing
- E. Material requirements planning

Answer: A, B, C, E

Explanation:

Question: 24

The first release of the SAP Asset Manager Mobile application is based on_____.

- A. Windows only
- B. iOS, Android and Windows
- C. O Android only
- D. iOS and Android
- E. iOS only

Answer: E

Explanation:

Question: 25

Once the Job Card is printed, the status of the order changes to_____.

- A. Conf
- B. TTJL
- C. TECO
- D. JIPR

Answer: B

Explanation:

Question: 26

A piece of equipment cannot be linked to a material. Determine whether this statement is true or false.

- A. True
- B. False

Answer: B

Explanation:

Question: 27

What is the missing word? With SAP S/4HANA, OLTP and _____ applications are managed within the same system.

- A. ETL
- B. JSON
- C. HTTP
- D. OLAP

Answer: D

Explanation:

Question: 28

You would like to preset a value for a field that you have to enter frequently. To do this, you need the parameter ID. Which help function would you use to locate the parameter ID when you are on the field?

- A. F4
- B. F1
- C. F11
- D. Application help
- E. System help

Answer: B

Explanation:

Question: 29

SAP S/4HANA is built to natively integrate with business networks such as:

- A. SAP Fieldglass
- B. SAP Concur
- C. LinkedIn
- D. SAP Hybris
- E. SAP Ariba

Answer: A, B, D, E

Explanation:

Question: 30

What are the names of SAP S/4HANA cloud editions?

- A. Marketing Cloud
- B. Supply Chain Cloud
- C. Enterprise Management Cloud
- D. Professional Services Cloud

Answer: A, C, D

Explanation:

Question: 31

Which of the following is true about calculating the cost for maintenance?

- A. It is calculated at the Order operation level by default.
- B. You can configure the system to calculate the cost at the header level in the ordertype customizing in SPRO.
- C. It is calculated at the Order header level by default.
- D. The operation account assignment (OAA) business function allows to calculate costs of maintenance orders at operation level.

Answer: C, D

Explanation:

Question: 32

Which of the following is true about SAP Asset Intelligence Network cloud application?

- A. It is the target of the application to maintain a global directory of pieces of equipment, that uses general definitions.
- B. A remote service technician is a typical user of this application.
- C. It is the target of the application, to improve the visibility of machines.
- D. A constructing engineer is the typical user of this application.

Answer: A, D

Explanation:

Question: 33

Why was the application code completely rewritten for SAP S/4HANA?

- A. To take advantage of the simpler data model
- B. SAP S/4HANA is now built with Java
- C. The optimized ABAP code that we developed for Suite on SAP HANA would not work with SAP S/4HANA
- D. To ensure that the code is optimized for SAP HANA

Answer: A, D

Explanation:

Question: 34

Which of the following is true about settlement rules?

- A. It cannot be changed once it is determined.
- B. It can be changed when the first settlement rule is maintained for the order.
- C. It must be entered manually in the order.
- D. The account assignment object is proposed from the master record for thereference object.

Answer: B, D

Explanation:

Question: 35

With SAP S/4HANA embedded analytics, which tools are aimed at end users?

- A. Analytical SAP Fiori applications
- B. SAP Smart Business cockpits
- C. Design Studio
- D. Query Designer
- E. Query Browser

Answer: A, B, E

Explanation:

Question: 36

Which of the following is true about SAP Work Manager?

- A. It is used in combinations with S/4HANA
- B. It is available only on SAP Cloud Platform
- C. It is used in combinations with SAP ERP and S/4HANA
- D. It is available in On Premise Edition and Cloud Edition

Answer: C, D

Explanation:

Question: 37

What happens when you enter an invoice with reference to a purchase order?

- A. The system suggests data only from the purchase order.
- B. The system suggests data only from the goods receipt.
- C. The system suggests data from the purchase order and the goods receipt.

Answer: C

Explanation:

Question: 38

Which of the following are examples of organizational elements?

- A. Client
- B. Company code
- C. All of the above
- D. Plant
- E. None of the above

Answer: C

Explanation:

Question: 39

Which of the following are true statements about master data?

- A. Master data is organized into views that are assigned to organizational elements.
- B. Master data is created centrally and is available to all applications and all authorized users.
- C. Master data decreases data redundancy.

Answer: A, B, C

Explanation:

Question: 40

The units of capacity in plant maintenance are managed in_____.

- A. Maintenance Planning Plant
- B. Organizational Units
- C. Maintenance Work Centers
- D. Maintenance Plant

Answer: C

Explanation:

Question: 41

Which of the following roles is responsible for executing an order during the corrective maintenance process.

- A. Warehouse Clerk
- B. Maintenance Planner
- C. Maintenance Supervisor
- D. Maintenance Technician

Answer: A, D

Explanation:

Question: 42

Which of the following describes an electronic data record of transactions that contains predefined information from master data and organizational elements?

- A. An Inventory
- B. A document
- C. A log
- D. A report

Answer: B

Explanation:

Question: 43

Time Segments describe _____ usage.

- A. Orders
- B. Equipment
- C. Notifications
- D. Functional Location

Answer: B

Explanation:

Question: 44

Which of the following BOMs will you use to setup spare parts planning of functional locations and equipment?

- A. Construction BOM

- B. Maintenance BOM
- C. Production BOM
- D. Costing BOM

Answer: B

Explanation:

Question: 45

What activities can be performed with a delivery document?

- A. Debit memo
- B. Goods issue
- C. Credit memo
- D. Picking

Answer: B, D

Explanation:

Question: 46

Which of the following provides general information on the SAP system and transaction or task on which you are working?

- A. Menu path
- B. Role bar
- C. Application toolbar
- D. Status bar

Answer: D

Explanation:

Question: 47

In the document management system, you can create new documents that contain information about equipment or repair instructions, and attach these to the maintenance order or operation.

- A. False
- B. True

Answer: B

Explanation:

Question: 48

What is the function of the print diversion setting?

- A. It enables you to chose a printer based on certain fields in the order.
- B. It tells the system that a shop paper for an order is ready to be printed.
- C. It enables you to determine which papers are printed for the technician.
- D. It enables you to define which shop papers are printed as a system default.

Answer: A

Explanation:

Question: 49

Which of the following statements are correct?

- A. Overheads on planned costs are determined as part of the standard cost estimate.
- B. Overhead rates are used to allocate sales and administration overheads.
- C. Overheads on actual costs are determined automatically when the order is saved.
- D. Overhead rates enable you to allocate overhead costs to cost accounting objects according to cause.

Answer: A, B, D

Explanation:

Question: 50

In which of the following locations can object information be found?

- A. In an order
- B. In a notification
- C. In a master record for the technical object
- D. In a document

Answer: A, B, C

Explanation:

Question: 51

In cost control, which of the following represents a closed system for cost accounting purposes?

- A. Company code
- B. Work center
- C. Controlling area
- D. Business area

Answer: C

Explanation:

Question: 52

To run apps in SAP Fiori launchpad you must assign the user ...

- A. Only the OData services on the frontend server
- B. Only the business roles on the backend server
- C. Roles on frontend and backend servers
- D. Only the business roles on the frontend server

Answer: C

Explanation:

Question: 53

Which of the following are checking instructions used to control availability checks?

- A. Checking rules
- B. Checking types
- C. Checking groups
- D. Checking profiles

Answer: A, C

Explanation:

Question: 54

Which of the following is not a Customizing setting for order types?

- A. Structure indicator
- B. Settlement profile
- C. Planning plant
- D. Residence time
- E. Settlement rule

Answer: A

Explanation:

Question: 55

Which of the following statements about configuring the notification screen are correct?

- A. You can apply a simple view or an enhanced view to each notification type.
- B. You can define only one screen area per tab.
- C. You can assign internal headings and symbols to tabs.
- D. You can choose from 27 different tab pages for each notification type.

Answer: A, C, D

Explanation:

Question: 56

What is the preferred client type for SAP S/4HANA?

- A. SAP GUI for HTML
- B. SAP Business client for HTML
- C. SAP GUI for Windows
- D. SAP Fiori launchpad

Answer: D

Explanation:

Question: 57

Which of the following statements about work centers are correct?

- A. They form the basis for cost calculation, capacity planning, and scheduling.
- B. They are organizational units that define when and where an operation must be performed.
- C. They can be machine, production lines, or people.
- D. They are only used in maintenance.

Answer: A, B, C

Explanation:

Question: 58

Which of the following statements about order settlement and business completion are correct?

- A. Technical completion occurs when all of the required tasks have been performed.
- B. After business completion, an order can be debited with actual costs.
- C. Settlement credits the order with the actual costs.
- D. Business completion is performed for an order that has been fully settled.

Answer: A, C, D

Explanation:

Question: 59

Which one of the following relationship types means that the end of one operation is linked to the start of the next operation?

- A. Start - Start
- B. Finish - Finish

- C. Finish - Start
- D. Start - Finish

Answer: C

Explanation:

Question: 60

Which of the following statements about commitments management are correct?

- A. Commitment values can exceed planned costs.
- B. Commitments lead to actual costs as a result of various business transactions.
- C. Commitments are contractual obligations that are entered in accounting.
- D. Commitments are used to update and monitor resources that are required for external procurement.
- E. Commitment data is built up when the scheduled order resources are valued.

Answer: A, B, D, E

Explanation:

Question: 61

A maintenance planning plant...

- A. Can only be assigned to one maintenance plant
- B. Can be assigned to various maintenance plants
- C. Is the organizational unit to which work centers are assigned
- D. Is only relevant for cross-plant planning

Answer: B

Explanation:

Question: 62

Which parameters are calculated during scheduling of a performance-based maintenance plan?
choose 2 answers

- A. planned date based on sum of counter readings
- B. monthly performance based on annual estimate
- C. daily performance based on annual estimate
- D. planned date based on cycle and daily performance

Answer: C, D

Explanation:

Question: 63

Which actions must the engineer perform to serialize piece of equipment? choose 3 answers

- A. assign a serial number profile to the equipment master
- B. add a serialized material into the construction type field of the equipment master
- C. assign a serial number profile to the material master
- D. add a serial number to an existing equipment master
- E. add a serialized material to the equipment serial data view

Answer: B, C, E

Explanation:

Question: 64

Which of the following is scheduling indicator? choose 1 answer

- A. time-latest date
- B. time-earliest date
- C. time-fixed date
- D. time-key date

Answer: D

Explanation:

Question: 65

What does the structure indicator define? choose 2 answers

- A. the field selection for the functional location list
- B. the category of the functional location
- C. the allowed characters for a functional location
- D. the hierarchy levels of the functional location structure

Answer: C, D

Explanation:

Question: 66

The maintenance engineer creates a single cycle plan with the following parameters:

- * the call object is maintenance order
- * the indicator or separate completion of maintenance call date is NOT set
- * the indicator for completion requirement is NOT activated
- * both shift factors are set to 100% .

Which date is relevant for the calculation for further planned dates for all objects? choose 1 answer

- A. planned date of the next call number

- B. completion date of maintenance plan
- C. technical completion date of the maintenance order
- D. basic finish date of the maintenance order

Answer: A

Explanation:

Question: 67

what is primary goal of sap predictive maintenance and service? choose 1 answer

- A. to precalculate maintenance projects
- B. to provide advanced cost controlling analysis
- C. to create a cloud-based equipment directory
- D. to collect and analyze machine data

Answer: A

Explanation:

Question: 68

Where can the planner check the material availability? choose 3 answer

- A. within the SAP fiori-based background job
- B. from the list of orders
- C. within an individual order
- D. within the SAP fiori-based material document overview
- E. from the reservation list

Answer: B, C, E

Explanation:

Question: 69

A technician uses the new SAPUI5-based apps. which steps can the technician perform when processing a malfunction report? choose 3 answers

- A. pause work
- B. put in process
- C. complete
- D. start work
- E. print

Answer: A, C, D

Explanation:

Question: 70

what can planner monitor with the resource scheduling for maintenance planner sap fiori app?
choose 2 answers

- A. workload of work centers
- B. maintenance order NOT confirmed
- C. Notification without maintenance orders
- D. non-available stock materials

Answer: A, B

Explanation:

Question: 71

what must you define for the material master before you can refurbish the corresponding material?
choose 1 answer

- A. MRP type replenishment
- B. transport group 0001
- C. split valuation of stocks
- D. serial number profile

Answer: C

Explanation:

Question: 72

How can you define the data transfer within a technical object hierarchy? choose 2 answers

- A. use the data origin function to change the supported fields in the functional location
- B. use the data origin function to change the supported for the piece of equipment
- C. use the data origin function to update the supported fields for the bill of materials
- D. use the reference functional locations for transfer data to the corresponding functional locations

Answer: A, D

Explanation:

Question: 73

The planner calls the document flow in the work order, which of the following document types are directly displayed? choose 3 answers

- A. material document
- B. accounting document
- C. time confirmation

- D. controlling document
- E. invoice

Answer: A, C, E

Explanation:

Question: 74

You have several defective parts that you need to send to a subcontractor to get them refurbished, what must you do to trigger the external refurbishment order? choose 1 answer

- A. create a manual purchase order and add the refurbishment order number
- B. create an external activity (PM 02) within the refurbishment order
- C. create a manual purchase requisition and add the refurbishment order number
- D. create an internal activity (PM 01) and add the defective material as non stock component

Answer: B

Explanation:

Question: 75

To which objects can you assign a budget? choose 2 answers

- A. maintenance order
- B. WBS element
- C. functional location
- D. planning plant

Answer: A, B

Explanation:

Question: 76

Which of the following are valid scheduling parameter in the multiple-counter plan? choose 2 answers

- A. call horizon
- B. schedule period
- C. start counter reading
- D. Or-link

Answer: B, D

Explanation:

Question: 77

What is the function of the offset within a maintenance strategy? choose 1 answer

- A. it shift the next planned date due to the delay of the confirmation
- B. it determine the first due date of the maintenance package
- C. it sets the start date of the maintenance plan
- D. it extends the cycle length of a maintenance package

Answer: B

Explanation:

Question: 78

What is a prerequisite to start a performance-based maintenance plan? choose 1 answer

- A. cycle modification factor
- B. call horizon
- C. initial measurement document
- D. scheduling period

Answer: C

Explanation:

Question: 79

You create a maintenance order with header-based costing, at which level the planner display the expected costs? choose 2 answers

- A. at the component level
- B. at the value category level
- C. at the work center level
- D. at the cost element level

Answer: B, D

Explanation:

Question: 80

Which must you define before you can create a new function location? choose 2 answers

- A. status profile
- B. structure indicator
- C. functional location category
- D. reference functional location

Answer: B, C

Explanation:

Question: 81

Which of the following objects can you directly assign when you define the work center master record? choose 2 answers

- A. calculation key
- B. business partner
- C. capacity category
- D. organizational unit

Answer: C, D

Explanation:

Question: 82

You set up the process for inspection rounds, so that the technician can enter measurement reading in a simplified way using the overall time confirmation.

What must do before you set up a general maintenance task list. choose 2 answers

- A. assign a measuring point as inspection point to the task list header
- B. create a piece of PRT equipment and allocate it using the PRT overview button
- C. assign a piece of equipment with allocated measuring point to a task list operation
- D. assign a measuring point as a PRT to a task list operation

Answer: C, D

Explanation:

Question: 83

Which operation can the responsible person perform after a maintenance order is technically completed? choose 3 answers

- A. change the planned cost
- B. update the estimated cost
- C. lock or unlock the order
- D. change the settlement rule
- E. create invoice receipt for delivered materials

Answer: C, D, E

Explanation:

Question: 84

In which product does SAP deliver embedded analytics? choose 1 answer

- A. SAP Business warehouse
- B. SAP S/4HANA
- C. SAP Business intelligence
- D. SAP BW/4HANA

Answer: B

Explanation:

Question: 85

What must you do before the system can generate entries in the action log of an equipment? choose 1 answer

- A. set the corresponding flag when you maintain the equipment category
- B. define an additional business view for equipment category
- C. assign a user status profile to the equipment category
- D. maintain the setting for the usage history

Answer: A

Explanation:

Question: 86

The technical completion of the actual maintenance order was posted with a delay of 10 days. How can the planner shift the next planned date by the same amount? choose 1 answer

- A. set the shift factor for the late completion to 10 %
- B. set the shift factor for late completion 100 %
- C. set the shift factor for early completion 100 %
- D. set the shift factor for early completion 10 %

Answer: B

Explanation:

Question: 87

Which of the following types is supported out of the box in technical objects? choose 2 answers

- A. controller
- B. contractor
- C. organizational unit
- D. maintenance plant

Answer: C, D

Explanation:

Question: 88

How do you activate subscreen for equipment master data in customizing? choose 1 answer

- A. create a view profile and assign it to the equipment category
- B. create a screen group info type and assign the group to the equipment category
- C. assign object information parameter to the equipment category
- D. define the field selection for the equipment master data

Answer: A

Explanation:

Question: 89

You create a revision for a maintenance event builder (MEB) scenario. which objects can manually assign to a revision? choose 2 answers

- A. automatically created maintenance order from a maintenance plan
- B. automatically created notification from a maintenance plan
- C. manually created notifications
- D. manually created maintenance orders

Answer: B, C

Explanation:

Question: 90

At what level does the system calculate costs of maintenance orders? choose 1 answer

- A. always on header level depending on the maintenance plant
- B. always on operation level depending on the order type and the maintenance planning plant
- C. on header level or on operation level depending on the order type and the maintenance planning plant
- D. on header level or on operation level depending on the controlling view

Answer: C

Explanation:

Question: 91

Which object combination influences the display of the fleet-specific tab strip and fields? choose 1 answer

- A. equipment category and measuring point category
- B. fleet object type and vehicle usage indicator
- C. equipment category and fleet object type

D. fleet object type and measuring point category

Answer: C

Explanation:

Question: 92

When the planner adds a non-stock material in the order , what are valid process steps? choose 3 answer

- A. post the goods receipt
- B. post the invoice
- C. post the goods issue
- D. create the purchase order
- E. post the credit memo

Answer: A, B, D

Explanation:

Question: 93

To which objects can you assign a safety plan? choose 2 answers

- A. work approval
- B. permit
- C. maintenanc order
- D. task list

Answer: C, D

Explanation:

Question: 94

What are the effects when the planner release a maintenance order? choose 3 answers

- A. the planner can estimate costs
- B. the planner CANNOT change planned costs
- C. the planner can print the job papers
- D. the technician can record confirmations
- E. the warehouse clerk can post a goods issue

Answer: C, D, E

Explanation:

Question: 95

To which of the following organizational units can you directly assign a maintenance plant? choose 1 answer

- A. controlling area
- B. standard purchasing organization
- C. personnel area
- D. profit center

Answer: B

Explanation:

Question: 96

What are the prerequisites to run SAP Work manager? choose 3 answers

- A. Mobile add-on for SAP S/4 HANA
- B. Sysbase unwired platform
- C. SAP mobile platform
- D. SAP Geographical enablement framework
- E. device operation system (ios, android or windows)

Answer: A, C, E

Explanation:

Question: 97

Which activities can the planner perform by using the maintenance planning overview with the default filters? choose 3 answers

- A. analyze outstanding notification that have NOT been assigned to the maintenance order
- B. analyze released maintenance orders whose end date is in the past and were NOT finally confirmed
- C. display purchase orders for non-stock material for which the goods receipt was NOT posted
- D. analyze confirmed maintenance orders which were NOT settled
- E. display approved purchase requisitions for non-stock material for which NO purchase order was generated

Answer: A, B, E

Explanation:

Question: 98

Which operations can the responsible person perform after a maintenance order is technically completed? choose 3 answers

- A. lock or unlock the order

- B. create invoice receipt for delivered material
- C. change the planned cost
- D. change the settlement rule
- E. update the estimate cost

Answer: A, B, D

Explanation:

Question: 99

Which material are displayed when the planner check the availability list? choose 1 answer

- A. only the non-available stock material
